TECMA PAINT ANTIGRAFFITI

Metro Train in Johannesburg, South Africa, protected by Tecma Paint Anti Graffiti, cleaned after attack

A Clear Transparent Coating for Efficient Protection Against Ugly Graffiti Attack

- Approved by several international railway and urban transport companies to provide safe & long-lasting protection to their rolling stock & vehicles
- Non-sacrificial coating - Protection continues after numerous graffiti attacks and subsequent cleaning
- Can also be used on unpainted building facades of Brick, Granite, Marble, Concrete, Natural & Artificial Stone, Monocoat Mortar, etc.
- Painted surfaces can also be protected, though a prior test to establish compatibility is recommended
- Any graffiti can be easily removed using Tecma Sol AP
- Makes easy the removal of usual urban dirt, grime & smog, keeping your building clean and smart

TECMA SOL AP

Special Cleaner for use with Tecma Paint Anti Graffiti

The use of Tecma Sol AP allows the complete removal of the most stubborn graffiti that a quick wash with soapy water will not shift.

It is particularly effective when used against markings left by aerosols, felt-tip pen, paint brush etc.

If a substrate's colour is altered by the application of Tecma Paint Anti-Graffiti, a prior coat of *Imprimacion A* will prevent this happening

A Comboios de Portugal train protected by Tecma Paint Anti Graffiti
