

## TECMADRY ELAST

### Cement Based Elastic Coating

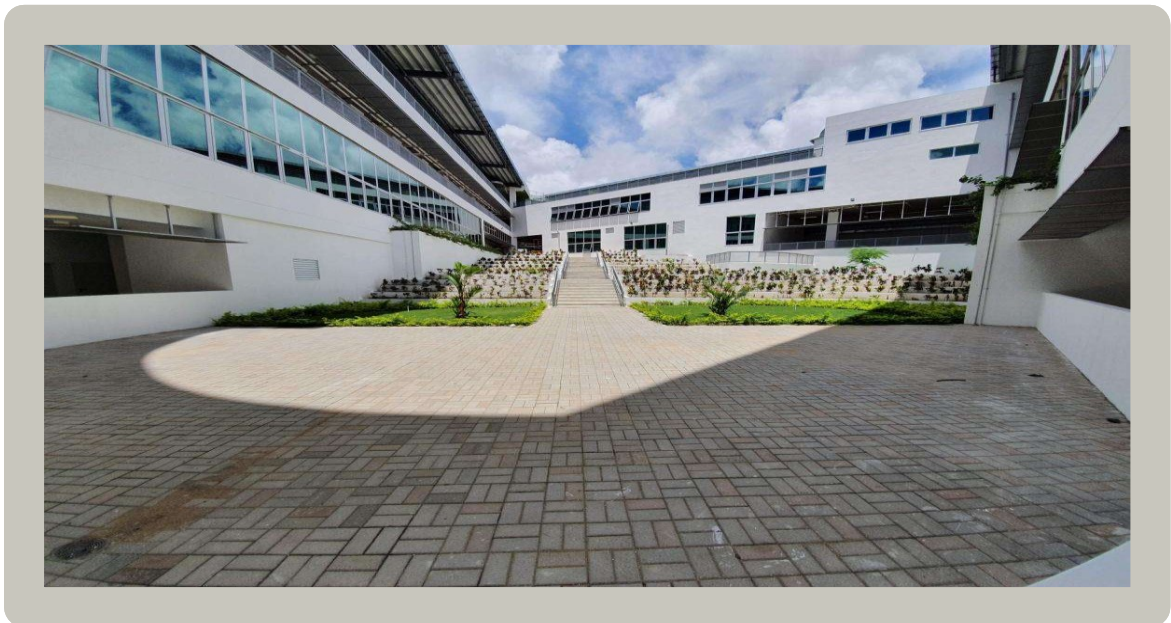

*Spanish Embassy, Dominican Republic, swimming pool waterproofed with Tecmadry Elast*

*Maternity Hospital, Limerick, watertanks sealed with Tecmadry Elast*

**High protection and waterproofing from a highly durable elastic cement based coating.**

- **Two-part pre-packaged product based on special cements and synthetic resins in emulsion**
- **Protecting or waterproofing civil works: tunnels, watering channels, silos, beams and pillars in bridges; dams, water-treatment plants, etc., basements, foundations, and tunnels**
- **Produces effective waterproofing, preventing water ingress in positive water pressure conditions**
- **High flexibility allows bridging cracks due to settling, thermal expansion, etc., maintaining its waterproofing and protection qualities.**
- **Allows the natural "breathing" of the substrate**
- **Use waterproofing and protecting surfaces with cracks, or which could be subject to movement**
- **Ideal for waterproofing and protecting salt water tanks**
- **Non-toxic, Chloride free, creates no powder**
- **High resistance to pollutant gases and ions.**

*Specialized Superior Technical Institute, Panama City*
